

Switch & Scale up to six sources with window animations and live transitions with CORIO[™]master micro.

Deliver exciting live event experiences with picture-in-picture, window animations and live transitions using the CORIO[™]master micro. Here, six sources are easily switched, scaled and positioned before being projected live onto a large custom resolution video wall. This example uses DVI and HD-SDI modules that allow both analog and digital signal processing, and low latency live content. The CORIO[™]master micro provides flexible, modular configurations to meet all your creative needs.

Equipment list

Computer with current Microsoft Windows operating system and network cable for set-up and system programming.

- 1 x CORIO[™]master micro (C3-503)
- 1 x HD-SDI input card (CM-HDSDI-4IN)
- 1 x DVI input card (CM-DVIU-2IN)
- 1 x DVI-I Output card (CM-DVI-I-SC-2OUT)
- 1 x DVI Monitor
- 6 x Sources and cables
