

CORIO[™]master micro Edgeblending application

Up to four sources projected with window animations and live transitions.

Create powerful Edgeblended presentations with Picture-in-Picture. Here, four sources are easily Edgeblended onto a large projection screen. The CORIO[™]master micro provides flexible, modular configurations. This example uses DVI and HDBaseT modules that allow both analog and digital signal processing, and low latency live content. Apply easily created live transitions and window animations to your presentation to really captivate your audience.

Equipment list

Computer with current Windows operating system and network cable for set up and system programming.

- 1 x CORIO[™]master micro (C3-503)
- 2 x DVI input card (CM-DVI-I-2IN)
